*****

▶ Provides guidance for everyday neuro-ophthalmology practice
▶ Discusses diagnosis, treatment and rehabilitation
▶ Lavishly illustrated throughout

This practical guide provides a complete algorithm for diagnosis and treatment, from ‘having a problem with vision’, via background and diagnosis, to treatment and eventually to rehabilitation of visual loss and eye-movement disorders in the central nervous system.

Following on from introductory sections devoted to the role of neuro-ophthalmology, recent developments in the field, and an overview of neuro-ophthalmological examinations, there are sections devoted to the different parts of the visual system, and finally a section on rehabilitation. The handbook gives an overall picture for all interested in neuro-ophthalmology, borderline territories and overlaps.

Neuro-Ophthalmology is aimed at ophthalmologists, neurologists, neurosurgeons, traumatologists, neuroradiologists, experts in cardiology and stroke, and trainees in these areas. It will also be of interest to neuro-rehabilitation specialists, neuropsychologists, and those working in typhlopedagogy and health informatics.
## Contents

### Part I  The Importance and Role of Neuro-Ophthalmology

1  The Importance and Role of Neuro-ophthalmology in Ophthalmological Clinical Practice  
   Judit Somlai  
   ........................................  3

2  The Importance of Neuro-ophthalmology in Neurology  
   Tibor Kovács  
   ...........................  5

### Part II  Objectives and Recent Results in the Neuro-Ophthalmological Clinical Practice

3  Mechanisms of Parallel Information Processing in the Visual System  
   György Benedek  
   ........................................  9

4  A New Direction: Neuro-endocrino-immunology  
   Csaba Balázs  
   ...............................  15

5  Visual and Oculomotor Disorders in Internal Diseases  
   György Pfliegler  
   .................................  19

6  Genetic Aspects of Neuro-ophthalmological Diseases  
   Mária Judit Molnár  
   ........................................  27

7  Recent Knowledge in the Neurosurgical Practice Regarding the Visual System  
   János Vajda  
   ........................................  33

8  The Role of Gamma Knife Stereotactic Radiosurgery in the Treatment of Neuro-ophthalmological Diseases  
   György T. Szeifert and Jenő Szeifert  
   ........................................  37

9  Neurointerventional Treatment of Diseases Causing Neuro-ophthalmological Symptoms  
   Istvan Szikora  
   ........................................  47

10 Recent Results in Neuropathology: Demyelinating and Conformational Diseases  
    Tibor Kovács  
    ........................................  59
Part III  Conventional, Novel and Complementary Examinations in Ophthalmology

Functional Tests of the Visual Pathway System

Contents

Traumatic Optic Neuropathy

48 The Significance of Neuro-ophthalmology in the Diagnosis and Therapy of Cranial Trauma 421
György T. Szeifert and Judit Somlai

Toxic and Deficiency Optic Neuropathy

49 Toxic and Deficiency Optic Neuropathy 433
Vera Klein

Eye Related Symptoms and Signs of Intracranial Hypertension

50 Ocular Symptoms and Signs of Intracranial Hypertension 437
Judit Somlai

51 Big Blind Spot Syndrome (Papillophlebitis) 453
Gyula Gács and Ildikó Szilvássy

Part V Neuro-Ophthalmologic Aspects of the Ocular Motor System

Disorders of the Pupillomotor Pathway

52 The Most Important Disorders of the Pupillomotor Pathway in the Clinical Practice 463
Judit Somlai

Infranuclear and Nuclear Neurogenic Paresis

53 Congenital Eye Movement Disorders 471
Andrea Deák

54 The Most Important Clinical Syndromes of Acquired Nuclear and Infranuclear Eye Movement Disorders, and Their Diagnostic and Therapeutic Options 483
Judit Somlai

Neurogenic Paresis Due Too Dysfunction of the Brainstem

55 Eye Movement Disorders Related to Brainstem Dysfunctions -Types, Clinical Significance of Vertical Localization, Modern Therapeutic Principles 493
Judit Somlai

56 The Clinical Significance of Otoneurology in the Diagnosis of Brainstem Disorders 507
Ágnes Szirmai

57 Examination of the Eye Movements of the Patient in Coma 513
György Geréby
Supranuclear Eye Movement Systems and Their Clinical Significance

58  Supranuclear Regulation of the Eye Movements
    and the Significance of Their Disturbances          523
    Szilvia Gulyás

Disorders of the Neuromuscular Junction (MG and OMG),
Non-isolated Ocular Muscle Paresis and Myogenic Paresis

59  Disorders of the Neuromuscular Junction
    and Their Diagnostics           535
    László Sándor Fornádi

60  The Ocular Characteristics and Differential
    Diagnostics of Mixed Types Eye Movement
    Disorders (Disorders of Ocular Neuromuscular
    Junction (OMG), Non Isolated Ocular Muscle Paresis
    and Myogenic Paresis)          545
    Judit Somlai

61  Endocrine Myopathy and Orbitopathy         561
    Csaba Balázs

Part VI  Diseases of the Orbit

62  Diagnostics and Therapy of Diseases of the Orbit   573
    Katalin Korányi

63  Traumatic Injuries of the Orbit             593
    György Pulay

Part VII  Neuro-Ophthalmological Considerations
          of the Facial Nerve

64  Tumor Lesions of the Facial Nerve  637
    Ildikó Gádor

Part VIII  The Neuro-Ophthalmological Aspects of Headaches

65  Neuro-Ophthalmological Aspects of Headaches
    from the Neurologist’s Aspect  647
    Csaba Ertsey

Part IX  Rehabilitation

66  Viewing Down from the Top: Visual Impairments
    Developing as a Consequence of Cortical Injury  663
    Anna Verseghi and Zita Snagy Nagy

67  Ignored World Without Missing It Neglect  677
    Anna Verseghi and Zita Snagy Nagy
